---

Gary,

Another San Jacinto letters.

The cover letter that we just prepared covers some of the issues raise in this Harris County request. We will need to outline what follow up oversight/review will be conducted.

Also, in EPA's response, we need to upfront clearly state that this incident was not a cap failure and neither were the previous rock displacement events.

We fully agree with Harris County that the Time Critical Removal work was a temporary fix and it has severed the purpose of preventing releases. CAS
